

ScopBOX TM

UNIFIED COMMUNICATION CONCENTRATE

COMPETITIVE SOLUTION FOR ENTREPRISES AND THEIR INTERGRATORS

Hardware

Very low heat dissipation, power consumption similar to that of a light bulb, and no noise..

ScopBOX is based on the latest Intel mini barebone called NUC, the «Next Unit of Computing».

Packed with Power! Its performance has no relation to its size.

Although only 3.9 cm high with a base of 11.2 cm, it includes, depending on the number of phones to manage:

- » 1x Intel Core i3 3217U 1,8 GHz Dual Core CPU
- » HyperThreading mode (4 Threads)
- » From 4 to 16 Go of RAM SO-DIMM DDR3 (1066/1333/1600 MHz)
- » 1x NIC 10/100/1000 Mb/s
- » From 32 to 256 Go Solid State Drive (SSD)
- » 3x USB 2.0 ports
- » 2x HDMI ports
- » 1x 65 Watts AC adaptor

3 year standard ScopBOX warranty.

Software

No compromise on features.

The ScopBOX is loaded with the full version of ScopTEL, the highly regarded IP telephony and Unified Communications software.

Available in 10, 25 and 50 positions, each user can enjoy all the integrated features, including:

- » Advanced telephony features
- » Unified Voice Mail
- » Fax-to-Mail, Mail-to-Fax
- » Audio conference bridges
- » Advanced IVR
- » Advanced ACD
- » Click-to-Call
- » Call by name
- » Presence, chat, collaborative work
- » Integrated billing*
- » Real time web management interface, supervision for operators, users and administrators
- » Multi tenant environment
- » ...

Integration

You order, we set it up for you.

Because you do not have the resources or, more simply, you prefer a managed solution, we can perform these services for you.

Upon purchasing a ScopBOX, a Request For Information (RFI) document will be provided in order to establish in detail the functional needs of your customer, and meet the specific characteristics of the concerned installation.

Besides the ScopTEL IP PBX software integration within the ScopBOX, the provided integration includes: General settings, network settings, creating facilities (Class of Service), extensions, trunks, outgoing / incoming lines, the provisioning of devices the group settings, functional testing and general validation.

A full backup is performed prior to shipping the customer's site or at your location.

Last task standing... **deploy and work !!!**

Maintenance

Well maintained Customer = Satisfied Customer

Customer loyalty is directly related to a well balanced and periodic system maintenance. Also, in order to deliver on this point, we have established an outstanding support and maintenance plan for your ScopBOX installations:

- » Standard 3 year level 2 local ScopTEL support access: Monday to Friday from 9am to 6pm,
- » Provision for minor and major versions of ScopTEL for 3 years,
- » In case of hardware failure, early replacement exchange server with a model at least equivalent, reloaded with the last provided backup.

It should be noted that automatic backup server can be programmed daily, and optionally also be sent to us automatically by email, thus reducing the time of replacement.
