Lots of new functionality

- More user-friendly layout to improve user efficiency.
- More-dynamic and attractive bar & pie charts, thanks to HTML5 technology.
- Simplified and unified filters, easier access to reports (CDR, DAA, RVI...).
- Hierarchical links between data and reports.
- Available in French and English.
- Full compatibility with Asterisk 1.8.
- Totally rethought and redesigned real-time monitor for greater flexibility in use with a more fluid, faster and less system-demanding display.
- New real-time monitoring systems for System Reports with system services controls (startup, shutdown, reboot).
- New Call Detail Reporting (CDR).
- Faster access to the database of Agent Call Distribution Reports.

New telephony reporting

- Real-time data access (real-time monitoring).
- Enhanced information tracking thanks to simultaneous access to multiple reports.
- Improvements to virtually all existing reports.

Now uses HTML5 rather than Flash for charts and is compatible with the iPhone and the iPad.
