## What's new in ScopSWITCH™

Designed for the administrator and authorized users, this interface is ideal for any operator, allowing them to monitor the call center, checking the status, queues and agents.

- The editor menu panel is integrated directly into the interface for easy management (to create, modify, delete).
- Create public menu panels, accessible to all authorized users.
- Create private menu panels, accessible only to currently connected users.
- Enhanced display of elements in a ScopSWITCH™ menu panel, for simpler and easier access to various information.
- Faster and more fluid refresh of data in the ScopSWITCH™ menu panel.
- Virtual phone added, for remote control of a telephone connected to ScopTEL™ IP PBX and its calls.
- A receptionist version of the virtual telephone is now available that displays more than four calls.
- Contact management with a call button and send-message button.
- Display contact status (Available, Busy, Do not disturb, etc.).
- Get the history of the virtual telephone (all calls in the past 24 hours).
- Personalize the display of every ScopSWITCH™ panel, based on the preferences of the connected user.

ScopTEL and ScopSWITCH are registered trademarks of ScopServ International inc.

\* OPERATOR mode is optional.
